2. **Management of DNS system**

Management of .am ա .հայ domain DNS servers

Update and relocation of DNS servers

1. Datacenter migration completion,
2. Optimization of the use of optical cable and services ordered from GNC and Arpinet for data transfer.
3. Deprecated DNSSEC key removal and installation of the new ones.
4. Update BIND on the new version master server.

5. Revising and amending the registry code to implement the board's decision to remove the 15-day domain retention period.
6. PHP 8 code optimization.
7. Completion of VH and AMNIC server upgrade.
8. Migration to new equipment, review of the monitoring system and possible transfer to a new one.
9. Finalization of DNSSEC core algorithm update.
10. Upgrading Algorithm Keys.
